

Hydro One is
energizing
a sustainable future

Inspire new thinking for greener power transmission across Ontario.

That's the idea behind Hydro One's recent \$2.5-million partnership with Western's Faculty of Engineering. Building on a decade-long relationship with some of Canada's leading experts in power systems engineering, Hydro One is investing in teaching and research to ensure the changing energy needs of Ontarians are met well into the future.

**Thank you Hydro One for supporting the education
of tomorrow's energy professionals.**

**MAKE A
DIFFERENCE**

Learn more about
what Western is doing to
support environmental
management and a
sustainable future.
